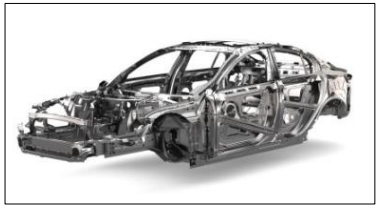
# UTOMOTIVE
## DIVISION

### Model design

Elim DMP always check sketches and renderings to reproduce designers' intention correctly.
Furthermore, we make various sorts of real models such as Exterior, Interior, Seats, Components, Checking model with optimum materials

### Display car

Display car is very important because it includes the best brand's design and technologies.
There are two types of display cars: all new making car and partially changed model.



### Prototype

Prototype is made for verification exterior · interior design, ergonomics and manufacturing effectiveness after vehicle structure design is completed.

# VIATION
DIVISION

## Simulator

Research and development of simulator for aircraft invention and training

## Full-scale airframe mock-up manufacturing

Manufacture full-scale airframe mock-up that has same size, structure and function with real aircraft to achieve better performance and structural effectiveness.

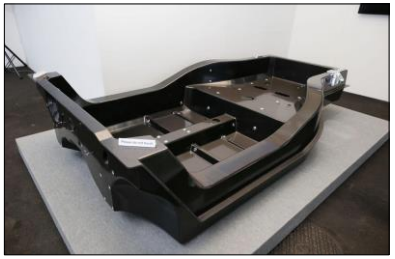
## Mass manufacturing components

Manufacture various kinds of components that are certified with AS9100 for real airplanes

DVANCVED MATERIAL
DIVISION

## Railroad Industry

Manufacture various components for train by using CFRP



## Vehicle Industry

Manufacture prototype car's BIW by using CFRP

## Aviation Industry

Manufacture airplane simulation panels by using CFRP
